

SYNERGIES

Real and synthetic scenarios generated for the development, training, virtual testing and validation of CCAM systems

CCAM CO-CREATION WORKSHOP

What scenarios should Europe prioritise for safer CCAM? Who should own, share and govern them?

Join us to help shape the future European Scenario Dataspace

September 9th

10:00–12:00

Brussels, BE

Limited spots,
tailored discussions

Organised by

ika

**RWTH AACHEN
UNIVERSITY**

SYNERGIES Coordinator

Funded by
the European Union

WHY YOU SHOULD JOIN

The workshop will bring together OEMs, suppliers, standardisation bodies and type-approval experts to move from concepts to concrete decisions: which high-impact scenarios the platform must prioritise, what conditions must be met for data and scenarios to be shared, and which governance rules make a federated European scenario dataspace both trustworthy and sustainable in the long term.

SESSIONS

Session 1: Scenario generation for safety validation

- Demo: Scenario generation using the SYNERGIES marketplace
- Prioritisation of the key use cases where stakeholders most need scenarios
- Gap analysis and identification of optimisation opportunities to improve the marketplace's usability for the identified use cases

Session 2: Governance model definition of the European Federated Platform

- Identification of stakeholder expectations on roles and responsibilities in the European Scenario Dataspace and marketplace
- Definition of governance options and business model elements

Register using the Form

This workshop builds on the experts' discussions initiated during the co-creation workshop on SDV standards, organised by the SAE Group Europe and CLEPA on 8 September at the CLEPA offices in Brussels. You are invited to join that workshop too, if this is of interest to you.
