Roadmap to 2030: Scalable phased deployment

A significant investment

€20 million per year to deploy the service (vehicles, supervision, etc.)

Minibus and minicar type vehicles

Initial pilot deployment (20 vehicles)

PACT's ambition: pioneering European public authorities for autonomous public transport

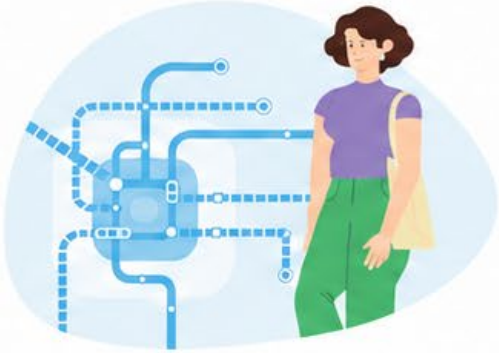

Shape European demand

Bring together public authorities' needs and define common requirements to give industry a clear market outlook and accelerate series production of autonomous vehicles.

Coordinate local deployments

Enable pioneering European public authorities to work together, develop services tailored to their territories and share operational experience.

Integrate autonomous mobility into public transport

Develop shared autonomous services that complement existing networks and offer an alternative to private car use.
